

Extract from a measurement

Here I am deliberately only giving a partial overview of the measured parameters.

I will analyse this information individually for you and discuss it in person or send it to you by email.

You can opt for a measurement and a very detailed evaluation. This costs €119 for the measurement, analysis and discussion.

There is also a shorter version for €59, in which the same measurement is taken, but only certain points are analysed and discussed.

Energy balance

Physiologische Tendenzen in der Regulations von Körperfunktionen

Significant weakening of energy? (emptiness syndrome)

- 8 - Kidney meridian (VIII, R): 8.3% (func.), 35.6 (morph.)
- 10 - Meridian of the "Triple Heater" Triple Heater (X, TR): 5.0% (func.), 29.7 (morph.)

Slight depletion of energy

- 2 - meridian of the large intestine (II, GI): 23.6% (func.), 101.1 (morph.)
- 6 - Meridian of the small intestine (VI, IG): 22.6% (func.), 79.1 (morph.)
- 7 - urinary bladder meridian (VII, V): 13.3% (func.), 56.9 (morph.)

- 11 - Gallbladder meridian (XI, VB): 14.4% (func.), 50.5 (morph.)
- 12 - Liver meridian (XII, F): 22.4% (func.), 78.4 (morph.)

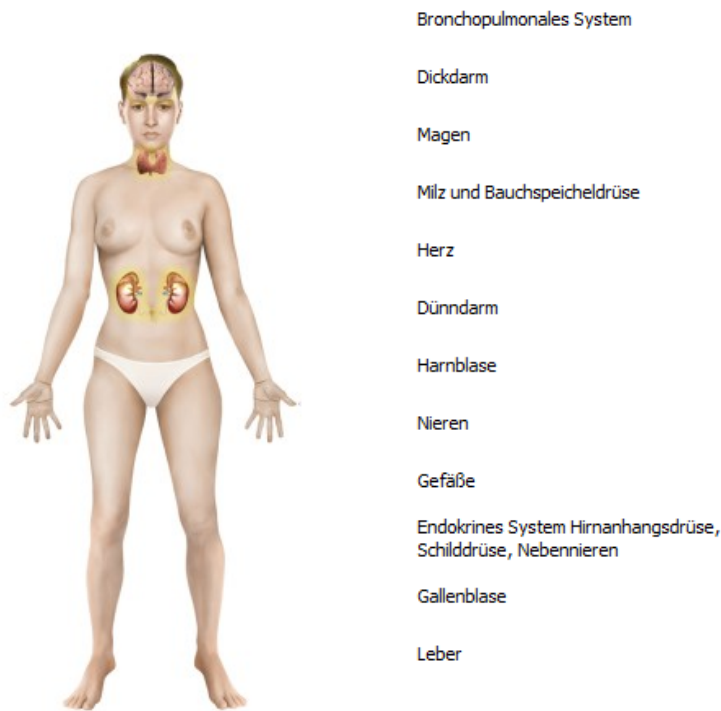

Standard

- 1 - Lung meridian (I, P): 54.9% (func.), 235.3 (morph.)
- 3 - Meridian of the stomach (III, E): 27.2% (func.), 160.4 (morph.)
- 4 - Pancreas and spleen meridian (IV, RP): 27.7% (func.), 163.0 (morph.)
- 5 - Meridian of the heart (V, C): 40.6% (func.), 142.0 (morph.)
- 9 - Meridian of the pericardium (IX, MC): 40.1% (func.), 236.0 (morph.)

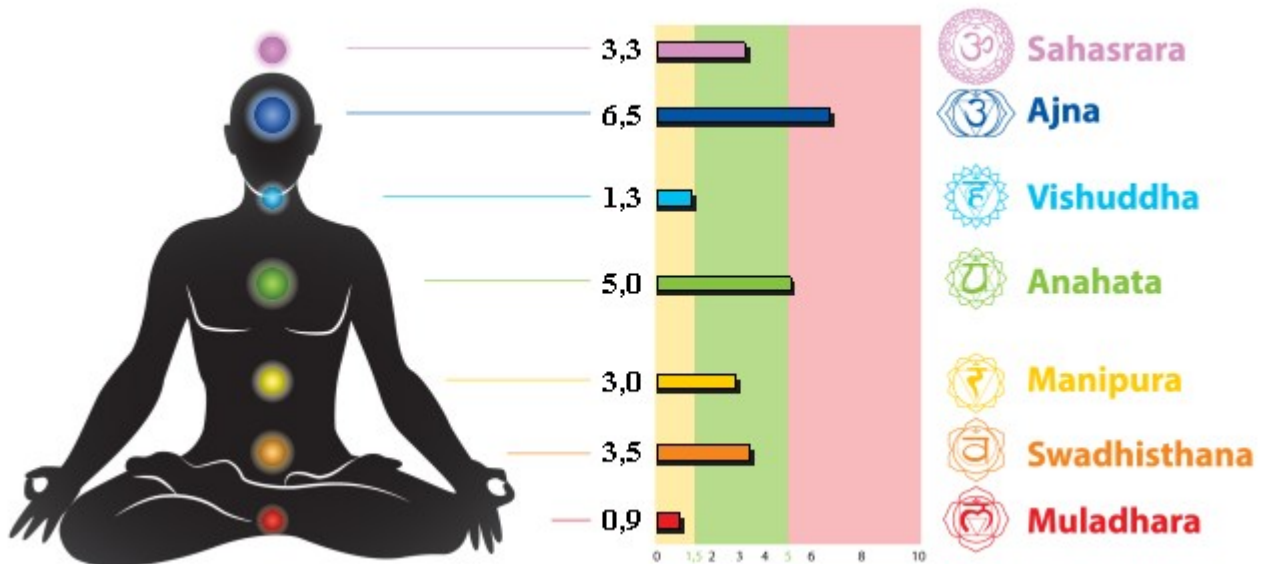

Slight tension of the energy

Significant stress? (Filling syndrome)
